

# 4th MASTERING ALIGNER SYSTEM

ADVANCED ALIGNER &amp; CLINCHECK® EDUCATION IN MALLORCA

Dr. Kenji Ojima

Dr. Udo Windsheimer

Dr. Dieter Brothag

ZTM Matthias Peper

## High-class seminar sparks international interest.

What started four years ago as an enthusiastic project by three friends who wanted to share their knowledge and experience of the Invisalign® system with their orthodontic colleagues now enters its fourth round after the surprisingly successful opening event in 2016.

The concept was convincing: Orthodontists gathered on the beautiful island of Mallorca for a three-day-seminar to learn the efficient use of the Invisalign® system. The island's early-summer flair provided the perfect scenery for exploring the features of one of the most modern treatment methods in orthodontics.

### Resounding success

The event quickly raised interest on an international level. In 2019, around 60 orthodontists from all over the world took part in this high-class event, increasing the number of participants for the third time in a row. The presenters were joined by two prominent guest speakers from Spain: Dr Susanna Palma and Dr Manuel Roman, founder of the EUMAA advanced training, managed to captivate the participants with their lectures.

### 2020 with international star speaker

For the event that will take place May 21st - 24th 2020, the organizers added an additional highlight. Taking the long trip from Japan, none other than Dr Kenji Ojima, undoubtedly the most sought-after presenter in aligner therapy, will take the stage.

The seminar will once again focus on mastering orthodontic Invisalign® treatments with confidence. Complex cases and impressive results at the highest level will be presented. Great emphasis will be placed on solutions for unpredictable treatment courses, which will be thoroughly discussed and illustrated with case studies.

### Trend-setting concept

The organizers are setting the tone for a new era in orthodontics by choosing not only a state-of-the-art treatment method but also an extraordinary seminar location.

This year's seminar will take place from May 21st to 24th in Mallorca.
